General Instructions:

(i) This paper comprises two types of questions: Short Answer Type and Multiple Choice Questions. The total marks for the paper are 30. Answer all questions to the best of your ability.

(ii) Multiple Choice Questions:

- These questions are numbered 3 to 17 and carry one mark each.
- Carefully read each question and select the most accurate option. There is only one correct answer per question.

(ii) Short Answer Type Questions:

- These questions are numbered 18, 19 and 20. Each question includes a specified word limit and mark allocation.
- Responses should be relevant. Allocate approximately 80% of your time to thinking and 20% to writing.
- Avoid replicating answers from neighbouring candidates' screens, as such behaviour is easily detectable and subject to penalties.
- Irrelevant answers, off-topic responses, or duplication of information from the question paper will not receive marks.
- Ensure that your answers are well-supported with relevant content from the course and suitable examples where applicable.

(iv) All characters, relationships, and events in the case or questions are fictitious. Any resemblance to real-life persons or events is purely coincidental.

[10 Cs of Teamwork] An AI product team is developing a new chatbot feature involving data pipelines, model tuning, and front-end integration. Two managers adopt different working styles:

1. Aanchal, the project manager, ensures the team converges on requirements during initial planning meetings. She then divides responsibilities, assigns clear deliverables and timelines, and expects members to work independently on their tasks. Progress is tracked through structured weekly updates to align outputs.

2. Akshay, another manager, engages the user experience designer and engineers in an ongoing iterative process. The team frequently brainstorms ideas together, refines solutions jointly, and addresses challenges in real time to improve chatbot personalization.

   What best describes the difference between the two approaches?

Options :

6406536025360. ✔ The first approach emphasizes coordination, while the second emphasizes collaboration

6406536025361. ✖ The first approach emphasizes collaboration, while the second emphasizes coordination

6406536025362. ✖ Both approaches demonstrate pure collaboration

6406536025363. ✖ Both approaches represent only coordination

[Cross-Cultural Strategies]: Organizations and project teams often rely on different strategies to manage cultural differences. Hofstede's cultural dimension scores offer insights into national value systems related to hierarchy, uncertainty, individualism, and collaboration.

Based on the cultural data provided and the project context, identify the most appropriate cross-cultural strategy being applied or required.

Options:
a) Cultural Dominance
b) Cultural Avoidance
c) Cultural Compromise
d) Cultural Accommodation
e) Cultural Synergy

Based on the above data, answer the given sub questions.

[Cross-Cultural Strategies] An Indo–German electronics design team is working on a safety-critical embedded systems project.

Cultural Data (Hofstede Scores):

- India: Power Distance = 77, Uncertainty Avoidance = 40
- Germany: Power Distance = 35, Uncertainty Avoidance = 65

The German engineers insist on strict documentation, predefined design reviews, and zero deviation from standards. The Indian engineers are asked to fully align with these processes, with no flexibility or adaptation of working styles.

Which cross-cultural strategy is being used in the given scenario?

Options :

6406536025372. ✖ Cultural Avoidance

6406536025373. ✖ Cultural Accommodation

6406536025374. ✔ Cultural Dominance

[Cross-Cultural Strategies] A Japanese–Indian semiconductor testing team collaborates remotely.

Cultural Data (Hofstede Scores):

- India: Individualism = 24, Uncertainty Avoidance = 40
- Japan: Individualism = 62, Uncertainty Avoidance = 92

Despite frequent misunderstandings due to Japan's preference for indirect communication and India's flexible problem-solving style, the Indian project team chooses not to address differences, assuming things will settle on their own.

Which cross-cultural strategy is being demonstrated by the Indian team in the given scenario?
Options :
6406536025377. ✖ Cultural Synergy
6406536025378. ✔ Cultural Avoidance
6406536025379. ✖ Cultural Compromise

[Cross-Cultural Strategies] A global AI analytics team includes data scientists from India and the United States, working on a fraud detection model.

Cultural Data (Hofstede Scores):

- India: Individualism = 24, Power Distance = 77
- USA: Individualism = 60, Power Distance = 40

After early conflicts, the team agrees on a middle ground:

- Use individual ownership for model components (U.S. preference), and
- Conduct collective peer reviews and manager sign-offs (Indian preference).

Which cross-cultural strategy best describes this approach?
Options :
6406536025382. ✖ Cultural Avoidance
6406536025383. ✖ Cultural Accommodation
6406536025384. ✔ Cultural Compromise

[Cross-Cultural Strategies] A multicultural data science lab (India, France, Netherlands) is developing ethical AI governance frameworks.

Cultural Data (Hofstede Scores):

- India: Long-Term Orientation = 51
- France: Long-Term Orientation = 60
- Netherlands: Long-Term Orientation = 67

Rather than choosing one dominant national approach, the team integrates:

- India's contextual decision-making,
- France's structured ethical review processes, and
- Dutch consensus-driven discussions to create a new shared operating model.

Which cross-cultural strategy is being applied?
