## Indian Institute of Technology Madras

### EDUCATION

| Degree/Examination                  | Institute/Board                        | Year of completion | CGPA/% |
|-------------------------------------|----------------------------------------|--------------------|--------|
| Dual Degree, Electrical Engineering | Indian Institute of Technology, Madras | 2021               |        |
| XII                                 | Narayana Junior College, Hyderabad     | 2016               |        |
| X                                   | Sri Sai Vijetha Concept School         | 2014               |        |

### SCHOLASTIC ACHIEVEMENTS

- AIR xxx in Jee Advanced 2016.
- AIR xxx in Jee Main 2016.

### SKILLS

- Programming Languages:** C, C++, Python, VHDL, Assembly Language.
- Web Development Skills:** HTML.
- Softwares:** Matlab, Command Line, MS-Office, LabView, Xilinx.

### RELEVANT COURSES

- Fundamentals of Deep Learning\*
- Pattern Recognition and Machine Learning
- Introduction to Data Analytics\*
- Programming and Data Structures
- Theory and Applications of Ontologies\*
- Data Processing with Python (udemy)
- The Data Science Course 2020: Complete Data Science Bootcamp (udemy)
- Introduction to Programming.
- Applied Programming Lab (Python)
- Linear Algebra for Engineers.
- Discrete Mathematics for Computer science
- Probability Foundations for Electrical Engineers.
- Accounting and Finance for Engineers.
- Principles of Economics..

\* - Undergoing courses

### PROFESSIONAL EXPERIENCE

- Analyst at Goldman Sachs Solutions pvt Ltd** Summer Internship (2020)
  - Developed some metrics to find the patterns in a Cluster of trades and to understand the root cause for the differences in MTM value.
  - Developed an Algorithm to find Similar trades to a Cluster which helps in understanding whether GS is wrong or the Counter party is wrong in pricing a trade.

### PROJECTS

- Developed a **Movie Recommender System** for Movie Lens dataset CS 5691 (2019)
  - Recommends suitable movies to the users.
  - Different ML techniques like Regression, PCA, SVM and Decision Trees are used.
- Course projects** in collaboration with a team of 3 people CS 6910 (2020)
  - Developed Machine Translator from English to Telugu using CNN-LSTM encoder-decoder framework.
  - Developed an Image Captioning System with high BLEU-k score performance.
  - Achieved over 90% accuracy on Image Classification task using pre trained models VGG, GNet.
- Developed a **Moodle Crawler** Application using python. SPW (2017)
  - Searches a student's moodle account for any new assignments and downloads them.
  - Developed using python modules like Selenium, BeautifulSoup and smtplib.
- Developed a **Moodle Crawler** Application using python. SPW (2017)
  - Searches a student's moodle account for any new assignments and downloads them.
  - Developed using python modules like Selenium, BeautifulSoup and smtplib.
